

## Decontamination Procedures

[www.networkofhope.net](http://www.networkofhope.net) | [info@networkofhope.net](mailto:info@networkofhope.net)

1. Remove all clothing and other items in contact with the body. Do not pull contaminated clothing over the head; cut off to avoid contact with eyes, nose, and mouth.
2. Put contaminated clothing and items into a plastic bag, if possible.
3. Wash hands with soap and water.
4. Remove eye glasses or contact lenses and put glasses in a pan of household bleach to decontaminate.
5. Flush eyes with lots of water.
6. Gently wash face and hair with soap and water; then thoroughly rinse with water.
7. Decontaminate other body areas likely to have been contaminated by blotting with a cloth soaked in soapy water and then rinse with clear water.
8. Change into uncontaminated clothing (clothing stored in drawers or closed closets).
9. If possible, proceed to a medical facility for screening.
