

Magnetic Signs: If you have trained your people through Network of Hope's Early Response Training and are connected with Network of Hope, you can purchase Magnetic Signs for your vehicles. The signs have the Network of Hope logo, your church name, and the county name on them. If you'd like to purchase signs, just contact us. We give the sign company the names of qualifying churches and the person who is assigned to make the purchase.

Badges: Badges acknowledge that you have had training for Disaster Response. They are very helpful in post disaster work. Network of Hope gives badges to those who have attended the Early Response Training. Manatee County Emergency Management ESF15 has approved the training and makes the badges for us. Wherever you go to do disaster response, having a badge that acknowledges that you are trained and work through an organization, is a huge asset. It is no problem to receive a badge from Manatee County if you are not from this county. It only means that this is the county where you are networked and have received your training. The badges are good for 2-3 years, at which point you would need to go through the training again for a reduced price.
